

AQUA by MSC is a mineral-enriched drinking water produced directly on board from filtered sea water using advanced purification technology. Developed in partnership with ClaroSwiss, global experts in drinking water optimization, AQUA combines purity with essential minerals like magnesium and potassium to deliver a crisp, refreshing taste. **MSC World Europa** is the first ship to feature this innovative system as a pilot, then it will be extended gradually to other ships.

Unlimited AQUA – still or sparkling – will be included with all MSC drink packages*, while it will be available for purchase for guests without a beverage package. Please check all DRINK Packages Details [HERE](#).

- Main Restaurants: It will be **served from MSC Cruises-branded reusable glass bottles**
- Buffet/Bars: it will be **served by Glass** (no longer by plastic bottles). Bar Teams will also refill guests' flasks if requested
- Refill Stations: stations will be available **for service by Glass** and to **refill** guests own aluminum flasks; in addition, refillable MSC Cruises-branded flasks are available for purchase on board.
